

A GUIDE TO NATURAL STONE FROM LUNDHS.

Crafted by nature, refined for living

At Lundhs, our philosophy is simple. Take nature's own materials and reshape them. Enhance their functionality and appearance. Without harming the environment. Without polluting air or water. Nature reshaped, for you to build your future on. Welcome to natural stone from Lundhs.

Durable, distinctive and 100% natural. Lundhs natural stone has a wide variety of applications. Our stone can be found in high-class building exteriors, in the lobbies of the finest hotels, in fashionable bathrooms and stylish kitchens. Natural stone from Lundhs is one of the world's most elegant and exclusive building materials.

Prized for its beauty and durability, our natural stone adds value and longevity wherever it is used. This guide features examples of interior and exterior architecture created

using natural stone from Lundhs. Each stone type is presented in different structures and finishes to give a clear impression of how it appears in real life.

KITCHEN

KITCHEN

Lundhs natural stone is an excellent choice for kitchen worktops.

- Naturally hard, heat-resistant and scratch-resistant, so food can be prepared directly on it
- Tested and proven radon risk-free and with no added engineered quartz: the healthy alternative
- With almost zero absorption, it cannot be damaged by food spills or detergents.

BATHROOM

BATHROOM

Lundhs natural stone is perfectly at home in residential and commercial bathrooms.

- Scratch-resistant properties and near-zero absorption makes it impervious to daily cleaning and detergent use
- There is no need for regular maintenance, meaning that the stone retains its appearance throughout the life of the bathroom
- Different finishes can be applied to increase friction, which is recommended for wet rooms.

FLOOR

FLOOR

Our stone's appearance and compatibility with other materials makes it a popular choice for residential flooring, and also commercial properties such as hotels and airports.

- Its hardness, longevity and scratch-resistant and no-maintenance properties make it the cost-effective choice
- Available in several different finishes, e.g. silk finish reduces friction and does not show walk patterns in high-traffic areas
- High break resistance means it can be applied in a range of thicknesses and applications.

INTERIOR DECORATION

INTERIOR DECORATION

Lundhs natural stone has been used worldwide for interior decoration on bar counters and reception desks, furniture tops and wall cladding.

- Its hardness and scratch resistance make it suitable for high-traffic areas like reception desks and bar counters
- High gloss finish and pearl effect gives an exclusive appearance for interiors
- Compatibility with other building materials like wood, steel and other natural stone means it has a wide range of interior decoration uses.

POOL

POOL

Lundhs materials are an increasingly popular choice for pools and water features.

- With almost zero absorption, Lundhs natural stone is regarded as the safe choice for pools and pool areas
- Different finishes can be applied to reduce friction at the poolside, while wet stone retains the same colour and pattern as polished stone
- Lundhs natural stone is not affected by pool chemicals.

OUTDOOR

OUTDOOR

Lundhs natural stone has a matchless range of applications for outdoor areas in all climates and weather conditions.

- With almost zero absorption, Lundhs materials are water- and frost-proof; critical for outdoor use
- Its range of finishes makes it suitable for walkways, water features, sculptures and monuments
- High weather resistance and low maintenance requirements make it the perfect choice for outdoor kitchens and garden furniture.

FACADE

FACADE

Lundhs materials can be seen in the main streets of most of the world's capitals, decorating landmark buildings and upmarket luxury stores.

- No maintenance requirements other than cleaning makes it the most suitable material for facades
- Available in a variety of finishes for a gloss or matte effect
- With maximum weather resistance and zero frost or water absorption, Lundhs natural stone can be applied on all kinds of facades.

RANGE

The following pages present the Lundhs range of natural stones. Lundhs natural stone is typically applied in a polished finish, but other finishes are available and are featured, with photographs, in the pages that follow. Some finishes change appearance significantly when wet or dry, and this is illustrated in this section. New finishes, like Silk or Caress, are becoming increasingly popular. However, some Lundhs materials are unsuitable for use in some finishes, so we have selected a careful blend of stone and finish to offer you the perfect answer to all your natural stone needs. The photos on these pages will give a good indication of the appearance of each material and the different finishes.

LTM Lundhs is Norway's leading exporter of natural stone.

LUNDHS As the sole supplier of some of the world's most elegant and exclusive granite, we deliver unique colours and durability to a global market. Our best-known stone is Larvikite, a rare granite from the areas surrounding the city of Larvik. We harvest seven varieties from our 15 quarries: Lundhs Silver, Royal Blue, Marina Blue, Emerald, Antique, Black and Ocean.

With more than 100 years of quarrying experience, we can ensure the quality and reliability you need to make your statement in natural stone.

Please do not hesitate to contact us for more information.
